

ALLDATA 2023

Forward

The Ninth International Conference on Big Data, Small Data, Linked Data and Open Data (ALLDATA 2023), held between April 24th and April 28th, 2023, continued a series of events bridging the concepts and the communities devoted to each of data categories for a better understanding of data semantics and their use, by taking advantage from the development of Semantic Web, Deep Web, Internet, non-SQL and SQL structures, progresses in data processing, and the new tendency for acceptance of open environments.

The volume and the complexity of available information overwhelms human and computing resources. Several approaches, technologies and tools are dealing with different types of data when searching, mining, learning and managing existing and increasingly growing information. From understanding Small data, the academia and industry recently embraced Big data, Linked data, and Open data. Each of these concepts carries specific foundations, algorithms and techniques, and is suitable and successful for different kinds of applications. While approaching each concept from a silo point of view allows a better understanding (and potential optimization), no application or service can be developed without considering all data types mentioned above.

We take here the opportunity to warmly thank all the members of the ALLDATA 2023 technical program committee, as well as all the reviewers. The creation of such a high-quality conference program would not have been possible without their involvement. We also kindly thank all the authors who dedicated much of their time and effort to contribute to ALLDATA 2023. We truly believe that, thanks to all these efforts, the final conference program consisted of top-quality contributions. We also thank the members of the ALLDATA 2023 organizing committee for their help in handling the logistics of this event.

We hope that ALLDATA 2023 was a successful international forum for the exchange of ideas and results between academia and industry and for the promotion of progress in the field of Big Data, Small Data, Linked Data and Open Data.

ALLDATA 2023 Chairs

ALLDATA 2023 Steering Committee

Yoshihisa Udagawa, Tokyo University of Information Sciences, Japan

Dong Quan Ngoc Nguyen, University of Notre Dame, USA

Fernando Perales, JOT INTERNET MEDIA, Madrid, Spain

ALLDATA 2023 Publicity Chairs

Laura Garcia, Universitat Politecnica de Valencia, Spain

Javier Rocher Morant, Universitat Politecnica de Valencia, Spain
